

**TECHNICAL SPECIFICATION:**

- Wireless communication with TECH controllers
- Bluetooth technology
- Range up to 100 m
- Communication protocol: RS-232
- Class Power – 1
- Cooperation with the application GasDroid
- Cooperation with the application GasSetting

BlueTECH^{XT} Communication Module

TYPE: Wireless Communication Module**MODEL:** BlueTECH^{XT}

BlueTECH^{XT} is an interface, which communicates wirelessly with the TECH controllers. Software adjusted speed transmission allows it to connect with the most of available controllers.

BlueTECH^{XT} cooperates with both factory built-in Bluetooth modules and external adapters.

INSTALLATION INSTRUCTION:

BlueTECH^{XT} should be connected to the controller's diagnostic plug and placed in a way that will prevent it from displacement or damage by the engine cover.
