

**TECHNICAL SPECIFICATION:**

- Digital LED panel cooperating with the TECH ONE controller
- Built-in microprocessor
- LED backlight
- LED with the brightness adjusting
- Integrated buzzer
- Adjusting the sound signal frequency
- Firmware update
- 3-pin connector with no need of soldering wires
- Supply voltage:
 - Max. (V) 15
 - Min. (V) 10

TECH ONE Switch**TYPE:** Digital Gas/Petrol Switch**MODEL:** TECH ONE

TECH ONE Switch allows to choose the fuel on which an engine has to work. It is equipped with LEDs which indicates the gas level in a tank and a so-called buzzer - beep indicating such parameters as:

- The moment of switching fuel
- Alert - low gas level in the tank
- Alert - no gas in the tank

INSTALLATION INSTRUCTION:

The switch should be assembled inside the vehicle's cab, in a place which is visible and easily accessible for the driver.
